What is Freeside?

Freeside is the Linux user group at Hull University. Our aim is to educate ourselves (and others!) about alternative open computing and free software.

Where?

We have a lab of Linux machines right next to RBB-LTD - follow the signs from the lift on the 3rd floor of the Robert Blackburn Building.

What can we offer?

- A space to meet with and learn from other students with similar interests
- Experience managing a Linux network (our lab is student-administrated!)
- Custom Linux virtual machines

Connect with us!
